

The Best Bees Company

Since 2010, The Best Bees Company has offered a unique, turnkey way for organizations to make a positive impact on the environment.

Best Bees maintains data-yielding honeybee hives on commercial and residential properties in urban centers across the US with the mission to improve pollinator health, expand the bee population, and support climate research.

Best Bees is a Certified LGBT Business Enterprise®.

CORE SERVICES

Professionally managed beehives by expert beekeepers

Bee and hive data collection, retrieval and analysis by leading scientists

Community engagement and educational programs like Hive Tours, Webinars and Keynotes

AN INNOVATIVE SOLUTION

Extensive network of data-yielding beehives

Proprietary data management system “Bzzz” collection and analysis of beehive data

Partnerships with research organizations driving the study of pollinator health forward

SUPPORTING ESG WITH BIODIVERSITY

Biodiversity is the variety of life that can be found on Earth, from plants, to animals, fungi, and micro-organisms. We're in a period of biodiversity decline, with concerns over pollinator deterioration, phenological changes, and the repercussions for food security.

With a networked beehive program, organizations can advance pollinator health worldwide and visibly demonstrate ethical priorities to stakeholders. HoneyDNA samples that Best Bees takes from these beehives can be incorporated into environmental reports, making a stronger case for ESG-focused investors.

How It Works

INSTALLATION

We help you choose an ideal location to establish one or more beehives at your home or workplace.

MAINTENANCE

Our impassioned and experienced beekeepers service your beehives once a month, providing high-quality care and detailed reports.

HARVESTING

You keep 100% of the raw honey produced. We'll handle the rest— small batch extraction and bottling with personalized labels.

RESEARCH

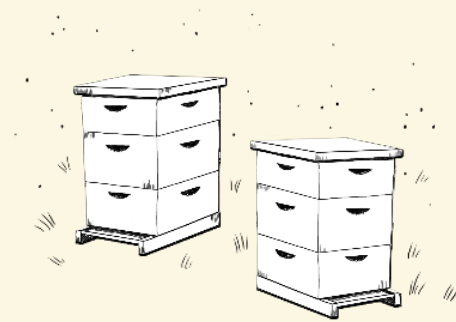

At every visit, we collect data and share it with our research partners to advance the science of beekeeping and improve the health of pollinators worldwide.

What Makes Best Bees Unique?

DATA-DRIVEN APPROACH

The Best Bees Company is the only beekeeping operation that collects pollinator data at scale for scientific research. This allows customers to make a positive impact on the environment through collective power, beyond just pollinating their own property.

SOCIAL ENVIRONMENTAL GOALS

Best Bees' data-yielding beehives give customers the opportunity to make a positive impact on the environment and position themselves as a sustainability champion. We help clients reach their ESG goals through our biodiversity offerings.

COMMUNITY ENGAGEMENT

When you have honeybees on your property, there's always something interesting to rally around. Best Bees provides their customers with the tools they need to foster community engagement around these fascinating creatures.

THE BEST BEES' IMPACT

67k beehive visit reports recorded for research
95 local beekeepers employed
22 operating regions
12 years as industry leaders in beekeeping

10 UN sustainable development goals advanced
6 research partnerships
3 TEDx Talks
1 shared mission to save the bees
